

You run the room and hold the clock.

You do not need to know AI; the roaming mentors handle tools. You have about 20 students in three or four squads of six, and one brief. Success is every squad pitching at 1:30 with something on a screen and every student saying at least one sentence.

YOUR JOB

- **You do:** keep time, ask questions, make sure quiet students get a say, run the pitch-off.
- **You do not:** fix tools (wave down a mentor), choose the idea, touch a keyboard, or present.
- **If something is wrong** (a student unwell, upset, or missing): find any staff member in an event shirt. Do not leave the room unattended with minors in it.

ROOMS

Tracks 1 to 4 are upstairs in the AA Building, about five minutes from Dyer Hall (QQ 109). Tracks 5 and 6 are in MM, next door to QQ. Every room is a computer lab. AA coaches: end your pitch-off at 1:55 so your group is seated for finals by 2:15.

YOUR CLOCK

TIME	WHAT YOU DO	SAY THIS
9:30	Hold your track sign in Dyer Hall and walk your group over.	"Track __, with me."
9:45	Squads of six. Mix schools and ages. One student reads the brief aloud. Each squad names a timekeeper.	"Nobody works with only people they came with."
10:00	Each squad picks one real person who has this problem.	"Give them a name and tell me about their Tuesday."
10:30	Checkpoint. Hear every squad's problem sentence.	"[Person] struggles with [problem] because [cause]. We will build [thing] so they can [outcome]."
10:30	Build. Circulate. Visit the quietest squad first.	"Show me what is on the screen."
11:30	Fifteen-minute warning before lunch.	"What will exist by 11:45?"
11:45	Lunch. Walk with your group.	
12:30	Finish the build. Rotate who is typing. Start the responsible-design slide.	"Who could this hurt, and what did you do about it?"
1:10	Hands off keyboards. One timed 3-minute rehearsal per squad.	"Everyone speaks. I am timing."
1:30	Pitch-off. Tracks 1 to 4 (AA) finish by 1:55.	
2:00	Walk back to Dyer Hall. Text your finalist's squad name to Dr. Calip.	

QUESTIONS THAT WORK IN ANY TRACK

- Who exactly is this for? What is their name?
- What happens today, without your idea?
- What does the AI read, and what does it produce?
- How would you know if the AI got it wrong?
- Who could this hurt or leave out?
- If you only had 30 more minutes, what would you cut?

WHEN A SQUAD STALLS

The idea is the whole sector ("fix healthcare")	Ask for one person and one bad day.
Arguing over two ideas	Two-minute pitch each, squad votes, move on.
One student doing everything	Give roles: builder, researcher, designer, ethics lead, pitch lead, timekeeper.
A tool will not work	Flag a mentor; meanwhile the squad writes the pitch.
Nothing built by 12:45	Switch to a plan with one worked example. That is a valid entry.
A student has gone silent	Ask them a direct, easy question about the person the squad chose.

TRACK 1 Health & Wellness: The appointment nobody keeps Room AA 201B

Opener for the room	"Who here has missed or nearly missed an appointment? What got in the way?"
Question that unlocks it	"What would they have needed to hear, and when?"
The trap	A plain reminder app. Reminders exist; the barrier is the problem.
Ethics prompt (15 pts)	"Your tool is not a doctor. Where is that line, and who sees the health details?"

TRACK 2 Logistics & Supply Chain: The last mile is the hard mile Room AA 201C

Opener for the room	"When did a late delivery last cost your family something?"
Question that unlocks it	"Who made the plan that day, and what did they not know?"
The trap	Rebuilding a giant carrier's system. Think two vans, not two thousand.
Ethics prompt (15 pts)	"Does your plan give the driver a break? How are wrong answers caught?"

TRACK 3 Small Business: Competing without a marketing department Room AA 204

Opener for the room	"Name a local business you love that deserves more customers."
Question that unlocks it	"What is the owner doing at 9 PM that is not their real job?"
The trap	Generic posts that could be for any business.
Ethics prompt (15 pts)	"Is every claim true? Does the owner approve before it posts?"

TRACK 4 Education: The students who quietly disappear Room AA 205

Opener for the room	"Think of someone who faded out of a class. What was the first sign?"
Question that unlocks it	"How would that student have wanted to be reached?"
The trap	A dashboard that watches students without helping them.
Ethics prompt (15 pts)	"Who sees the 'at risk' flag? Can the student see it?"

TRACK 5 Climate & Energy: Heat lands unevenly Room MM 145

Opener for the room	"Where is the hottest place you regularly spend time? Why there?"
Question that unlocks it	"On the worst day last summer, who near you was most at risk?"
The trap	A weather chatbot. The problem is who gets relief, not the forecast.
Ethics prompt (15 pts)	"How does this reach someone with no smartphone or no English?"

TRACK 6 Creative Media: Getting heard in an infinite feed Room MM 122

Opener for the room	"What story from your community should more people see?"
Question that unlocks it	"Where does that audience scroll, and what stops them?"
The trap	Letting AI write the story so it sounds like nobody.
Ethics prompt (15 pts)	"Did the people in it say yes? Will you say AI helped?"

RUNNING THE 1:30 PITCH-OFF

30 minutes for three or four squads. The timer is strict.

1. Draw the order from a hat at 1:25.
2. Each squad gets 3 minutes. Hold up a hand at 2:30. Stop them at 3:00, mid-sentence if needed.
3. Ask one question, the same for every squad: "What is the biggest risk in your idea, and what did you do about it?"
4. You and one mentor each fill in a scoresheet without conferring. Add the two totals.
5. Highest total advances. A tie goes to the higher responsible-design score.
6. Announce the finalist, then ask every other squad to name one thing they are proud of. Nobody leaves having only lost.
7. Remind the finalist: 3 minutes again in Dyer Hall at 2:15, same pitch, all six on stage.
8. Walk your group back to Dyer Hall by 2:10. Text the finalist's squad name to Dr. Calip and hand him the scoresheets.

SCORING

Score 1 to 4 (1 missing, 2 partly there, 3 solid, 4 standout), multiply, total out of 400. Polish is not a criterion. A rough prototype with sharp thinking beats a slick slide deck.

YOUR SQUADS

SQUAD	SQUAD NAME	WHO THEY ARE BUILDING FOR
