

CREATIVE MEDIA

Getting heard in an infinite feed

Anyone can post. Almost nobody gets seen, especially people telling stories from their own community with no budget and no team.

How might we help one creator or one community story reach the people who need to see it?

START HERE

What story from your community deserves a bigger audience? Who needs to see it, and where do they scroll? Which part of making it takes the longest?

WHERE AI CAN WORK

- Speeding up the slow parts: scripts, shot lists, captions, alt text
- Turning one story into several formats
- Researching who the audience is and what they already watch

YOU COULD BUILD

- One real story in three formats with a posting plan
- A creator's assistant: rough idea in, shot list and hook options out
- An audience brief recommending an angle nobody else is taking

THINK ABOUT (THIS IS SCORED)

Did the people in the story say yes? No cloning real people's voices or faces. Say when AI helped. Keep the voice that made the story worth telling.

YOUR DAY

- 9:45** Meet your squad. Read this page.
- 10:00** Pick one real person with this problem.
- 10:30** Problem sentence read to your coach.
- 10:30** Build version one.
- 11:45** Lunch
- 12:30** Finish. Make your risks slide.
- 1:10** Stop building. Practice the pitch.
- 1:30** Pitch to your track: 3 minutes.
- 2:15** Finals and awards, Dyer Hall

HOW YOU ARE SCORED

- 25 Problem clarity:** real, specific, belongs to a person
- 25 Use of AI:** AI does real work, not decoration
- 20 Feasibility:** someone could use it and it would matter
- 15 Responsible design:** bias, privacy, who could be harmed
- 15 The pitch:** clear, honest, everyone speaks

Squad name: _____ Who we are building for: _____

YOUR PROBLEM SENTENCE — write it before you build anything

_____ (a real person) struggles with _____

because _____. We will build _____

so they can _____.

YOUR 3-MINUTE PITCH

Meet the person (30 sec). Their problem today (30). What you built and what the AI does, shown live if you can (75). What could go wrong and your safeguard (30). What comes next (15).

RULES

Coaches and mentors help, but never build or present for you. Never type real private information about anyone into an AI tool. Check what the AI tells you; it can be confidently wrong. A working app, a set-up AI assistant, a clickable mockup, or a clear plan with one worked example can all win.
